ABOUT ME

As a 4th-year Computer Engineering student, I focus on building scalable web and mobile applications. I have a strong command of Next.js for modern front-end experiences and Android development for mobile solutions. With a solid understanding of Backend architectures, I enjoy bridging the gap between robust server-side logic and seamless user interfaces. I am a fast learner with a versatile mindset, always eager to explore new technologies and quickly adapt to evolving project requirements.

EDUCATION

Dokuz Eylül University

Computer Engineering / 2023 -

EXPERIENCE

Software Engineering Intern - Information Technology Department, İzmir Bakırçay University (July 2026 - September 2026)

- Developed a full-stack institutional Survey Management System using .NET 10 Web API, React, TypeScript, and MySQL.
- Implemented JWT authentication, role- and unit-based authorization, dynamic survey creation, response management, and CSV/Excel export.
- Built Gemini AI-assisted survey generation, secure external option imports, visual response analytics, and automated tests using xUnit and Vitest.

Software Engineering Intern - Probel Yazılım ve Bilişim A.Ş (July 2025 - August 2025)

- Developed a full-stack Hospital Feedback System using .NET 8.0 Web API and Kotlin (MVVM Architecture).
- Implemented JWT authentication and Oracle database integration via Docker.
- Built and tested RESTful APIs and integrated them with the Android mobile application using Retrofit and LiveData.

PROJECTS

Süprüz – Marketplace Platform & Startup (May 2026)

- Co-founded/Developed a location-based platform within a 5-person team, aimed at reducing food waste by connecting businesses with consumers.
- Selected as a Finalist among 150+ startup teams in the Yeni Girişim Yarışması (YGY) organized by Galatasaray University Entrepreneurship Club.
- Completed preliminary rounds, semi-finals, and extensive mentorship stages, successfully pitching the product and business model to an executive jury panel and industry professionals.

SKILLS

- Languages: Kotlin, Java, C, C++, C#, JavaScript/TypeScript
- Frameworks & Libraries: ASP.NET Core 8.0, Next.js, Node.js, Android (Retrofit, Room, LiveData)
- Databases & Tools: Oracle, MongoDB, Firebase, Docker, Git/GitHub
- Languages (Spoken): Turkish (Native), English (B2)
